

HORNET

The **HORNET** is a great looking frame that ensures you are well protected behind the 20 gauge, coated wire mesh lens.

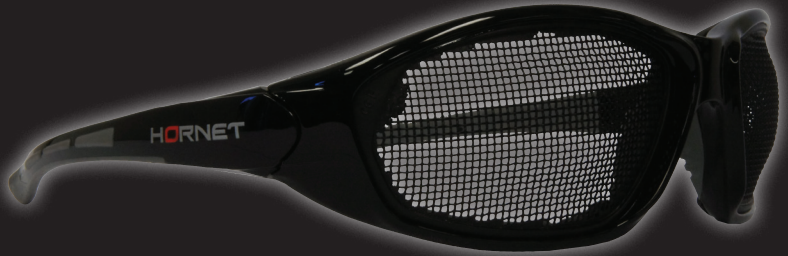

The **HORNET** has been tested for medium impact resistance as per AS/NZS1337.1 at 40 meters per second. It has also been tested at 60 meters per second without exceptions.

No more fogging up.

With mesh lens, your ocular area is well ventilated, allowing you unobstructed viewing.

The **HORNET** comes with a positive foam seal to provide back and side lens protection from swarf and other flying particles.

With in frame dual injected temples, the **HORNET** is a very comfortable wearing frame.

Positive Seal Backing

The **HORNET** is CE accredited with EN1731 to High Speed Particles (F).

Ideal usage of the **HORNET** mesh glasses:

CE EN1731 - High Speed Particles, F

High humidity area including paper/cardboard manufacturing areas	Commercial laundries
Food processing works at wash down	Forestry
Chainsaw/Edging/Brush Cutting	Underground Mining

Note: The **HORNET** is not ideal for work environments where particles are less than 0.9mm x 0.9mm.
