

8105 MAVERICK

PHOTOCHROMATIC / INDOOR & OUTDOOR

From Cat 0 to Cat 3

The 8105 Maverick photochromatic lens is a true indoor / outdoor safety lens.
The lens changes from a clear state to a darkened state when exposed to UV light.

In the clear state, as a category 0 lens, you can wear the 8105 Maverick indoors.
After exposure to UV light, the lens darkens and is a Category 3 tinted lens.

The 8105 Maverick design has an adjustable nose piece which can be moulded and formed to suit your nose and sitting comfort. Further comfort is enhanced with the co-injection temples.

The frame has been designed and manufactured as a solid frame for medium impact protection.

All lens are distortion free and provide UV protection.
The lens is also hard coated.

Each Maverick comes with a Microfibre bag.

The Maverick is certified to AS/NZS1337 by SAI Global with medium impact resistance.
